CareerObjective

SoftwareDeveloper with hands-onexperience infull-stack development, specializingin Golang back-end and Vue.js front-end. Experienced in building and integrating Restful API s, working with SQL databases, and developing saleable and efficient applications. Passionate about writing clean code, solving problems, and continuous learning. Seeking growth-oriented software development opportunities .

TechnicalSkills

- **Frontend:**Vue.js2,HTML5,CSS3,JavaScript(ES6+)
- **Backend:**Golang,Python,RESTfulAPIDesign
- **Database:**PostgreSQL,MySQL,SQLQueryOptimization,DatabaseDesign
- **Tools** :Git,GitHub,VSCode,Postman,Docker(basic),Linux
- **Concepts:**Microservices,APILogging,ErrorHandling,RetryMechanisms,PerformanceTuning

WorkExperience

SoftwareDeveloper

FlattradeBrokingPvt.Ltd-Chennai

| Apr2025-Present

- Developandmaintainfull-stackwebapplicationsusingGolang(back-end)andVue.js2(front-end), delivering saleable and responsive user interfaces.
- Design, build, and integrate Restful APIs consumed by internal dashboards and external services, ensuring high availability and low latency Building responsive user interfaces.
- Architect and optimize PostgreSQL database schemes and SQL queries to support efficient data storage, retrieval, and reporting.
- Implementerrorhandling,inputvalidation,andretrymechanismsthatimproveoverallsystem reliability and uptime.
- Collaborate withtheoperations team todiagnose and resolve API downtimeand performance bottlenecks in production environments.

Projects

1. ExternalApiResponseTracker

Technologyused:Vue.js2,Golang,RestAPI's,PostgreSQL.

- Designed and built an end-to-end API monitoring dashboard to track external service integration'sinrealtime.Implementedback-endAPIloggingservicesusingGoto recordrequestand response data.
- Built a live Vue.js 2 monitoring UI with filtering, search, and status indicators for APISuccess rates, failures, and latency trends.
- Integrated external API's with structured error handling and configurable retry mechanisms, reducing manual intervention during failures.
- Stored all API logs in PostgreSQL enabling audit trails and historical analysis – helped the operations team cut API downtime detection time significantly.

2. ClientFundMovingTracker

Technologyused:Vue.js2,Golang,RestAPI's,PostgresSQL.

- Designed and developed an Monitoring Screen to track client fund allocation and deallocation transactions across integrated systems.
- Implemented transaction tracking to ensure accurate fund movements and provide real-time visibility into API operations.
- Built automated validation and alerting mechanisms to detect critical transaction mismatches, such as successful fund deallocation from one client without corresponding allocation to the target client, and notified for respective team.
- Enhanced operational reliability by enabling rapid issue identification, manual intervention, and resolution of failed fund transfer processes.

Education

BE-Electronics and Communication Engineering

M.Kumarasamy College of Engineering-Karur

2019-2023

Higher secondary school

Nehru Higher Secondary School-Puthanampatti

2018-2019

Certification

- Python full stack development-QSpider institute

Personal Details

Date of Birth: 11 January 2002

Languages : Tamil, English

Nationality : Indian

Address: 1369-C, Nehru Nagar, Madhurapuri, Thuraiyur (Tk), Trichy (Dt)-621010.
